

**Founded:** 1999

**Employees:** about 35,000 worldwide\*

**Revenues:** pro-forma revenue of ~EUR 5,150 million\* in 2014 fiscal year (ending September)

**Product portfolio:** Semiconductors

**About Infineon:**

Infineon designs, develops, manufactures and markets a broad range of semiconductors and system solutions. The focus of its activities is on automotive electronics, industrial electronics, mobile devices and chip card-based security. Combining entrepreneurial success with responsible action, Infineon addresses some of the most critical challenges of society: Efficient use of energy, environmentally-friendly mobility and security in a connected world.

In January 2015, Infineon acquired US-based International Rectifier Corporation, a leading provider of power management technology, with revenues of 1.1 billion US-Dollar (2014 fiscal year ending June 29) and approximately 4,100 employees.

**Target Markets and Products:**

- Automotive: microcontrollers, discrete and integrated power semiconductors, power modules for hybrid and electric vehicles, voltage regulators, sensors, bus interface devices, radar ICs.
- Industrial electronics: power discretes, power modules, power ICs, driver ICs, microcontrollers, LED drivers, SiC and GaN components.
- Information and communication technology: small signal components, antenna tuning ICs, customized chips

(ASICs), CMOS switches, MEMS, RF power transistors.

- Security: contact-based, contactless and dual-interface security controllers, customized chips with security functions.

**Presence:** 33 research and development locations, 20 manufacturing locations, and about 45 sales offices worldwide.
