

**Shape tomorrow's energy landscape –
with us, today!**

At the world market leader in energy technology, you will contribute to keeping the energy supply stable in the future. With our intelligent digital and analogue solutions, you will help shape the implementation of the energy transition. In a global team of 3,800 committed colleagues, which is characterised by the unique cohesion of our family-run group of companies. Reinhausen - where Power meets Passion.

For our business unit Power our location Regensburg we are looking for you as:

Product Owner (f/m/d) for Power Electronic Converters

What challenges can you expect?

- You collaborate in the product roadmap definition
- You are responsible for the priorities and scope of the product in close collaboration with the project team and Scrum Master
- Your tasks include Requirement Management and internal/external Stakeholder communication as well as Product Backlog Management and Backlog detail and refinement
- You write and clarify user stories, including acceptance criteria
- You define the release plan and incremental releases

What do we expect from you?

- You have completed degree in the field of embedded systems, computer science or electrical engineering with deep knowledge in grid-tied power electronic converters
- You have several years of experience in related topics as well as a deep understanding on high power converters
- You have clear understanding on product development for power electronics and mechatronics systems
- Ideally, you have a good knowledge on grid code and power electronic standard compliance
- Furthermore, you have a good understanding on PCB design, BOM and design to manufacturing
- You are used to agile development methods as well as lifecycle management tools (like Integrity, doors or Atlassian)
- You have good communications skills in English and German
